# Busy Ant subtraction

Subtract two 2-digit numbers

You will need:

- sheet of paper

Example

$$38 - 17 = \boxed{21}$$

1	2	3	4	5	6	7	8	9	10
11	12	13	14	15	16	17	18	19	20
21	22	23	24	25	26	27	28	29	30
31	32	33	34	35	36	37	38	39	40
41	42	43	44	45	46	47	48	49	50
51	52	53	54	55	56	57	58	59	60
61	62	63	64	65	66	67	68	69	70
71	72	73	74	75	76	77	78	79	80
81	82	83	84	85	86	87	88	89	90
91	92	93	94	95	96	97	98	99	100

$46 - 23 = \square$

$69 - 35 = \square$

$87 - 54 = \square$

$32 - 16 = \square$

$58 - 53 = \square$

$66 - 49 = \square$

$84 - 57 = \square$

## What to do

- Help your child to complete the two-digit subtract two-digit calculations using either the 1–100 number square or by drawing a number line. Encourage them to choose the method that they prefer.

Write 10 different numbers between 10 and 99. Use the 10 numbers to create five subtraction calculations and both work out the answers. Your child should work out the answers on the back of this sheet while you work them out on a separate sheet of paper. Compare your answers, double-checking any where you got different answers.
