What to do

- Ask your child to write the total value of all the coins in the purse and then to draw the coin that is the same as this value.

Put five coins (from a selection of 1p, 2p, 5p, 10p or 20p coins) in a purse. Ask your child to take out the coins and work out the total amount. Can they find another way of making the same amount with fewer coins? Record the results on the back of this sheet. Repeat with different combinations of coins.
