Multiply and divide machines

Recall and use multiplication and division facts for the 5 times table

You will need:

- coloured pencils in five colours

What to do

- With your child, look at the numbers going into each machine. Ask your child to colour each set of five cards in five different colours. Then help them to multiply or divide these by 5, write the answers in the next set of cards and colour each answer to match each one.

On the back of this sheet, work with your child to write all the multiples of 5 from 5 to 60. Write the 12 numbers quite large and spread them out over the sheet. Then both of you put your index finger at the bottom of the sheet. Take turns to say a multiplication fact for the 5 times table, e.g. 6×5 . The first person to point to the answer wins a point. Put your fingers back at the bottom of the sheet and repeat. Who wins 10 points first?
