Teeth investigation

Solve 2-step problems in contexts, deciding which operations and methods to use and why

Find approximate answers to the questions using the information below. Show all your working.

- Most children have 20 teeth.
- Most adults have 32 teeth.

Challenge
1

How many teeth in your house when everyone is home?

Challenge
2

How many teeth in your family, including aunts, uncles and cousins?

Challenge
3

How many teeth do you think there are in all the homes in your street?

Read the question to someone at home and ask them to make an estimate of the answer. Then show them your working out and tell them if their estimate was close.
