

Name: _____ Date: _____

Target 7000

Add whole numbers with four digits using the formal written method

- 1 For each calculation, roll the dice eight times and decide where to write the digit.

Your target is to get an answer as close to 7000 as possible. Do this 12 times.

You will need:

- 0–9 dice

Hint Your thousands digits must add up to either 6000 or 7000.

a

	Th	H	T	O
+				
<hr/>				

b

	Th	H	T	O
+				
<hr/>				

c

	Th	H	T	O
+				
<hr/>				

d

	Th	H	T	O
+				
<hr/>				

e

	Th	H	T	O
+				
<hr/>				

f

	Th	H	T	O
+				
<hr/>				

g

	Th	H	T	O
+				
<hr/>				

h

	Th	H	T	O
+				
<hr/>				

i

	Th	H	T	O
+				
<hr/>				

j

	Th	H	T	O
+				
<hr/>				

k

	Th	H	T	O
+				
<hr/>				

l

	Th	H	T	O
+				
<hr/>				

- 2 Which calculation is nearest to 7000?
