# Missing prices

Solve one-step problems involving money, deciding which operations to use and why

Sam, the travel agent, has been busy today. The following shows the holidays that he has booked for people and the prices of some of these holidays.

One week in Greece £1325

Eurostar to Paris £

Everest adventure £

Fly drive in USA £3864

Walking in Austria £1570

Taj Mahal Discovery £

African safari £

Two weeks in Spain £2100

Snorkelling in the Red Sea £2376

Flight to Australia £

- 1 Find the missing prices by working out these problems.
  - a At 9.00 a.m. he sold a week in Greece and a Eurostar trip to Paris for £1860.
  - b At 10.00 a.m. he sold a snorkelling holiday and an African Safari. The total price was £4500.
  - c At 11.00 a.m. a family paid £9488, they bought a Fly drive holiday and an Everest adventure.
  - d At 12.00 p.m. he was pleased to sell a Taj Mahal Discovery holiday and two weeks in Spain. He charged £5400.
  - e A family want a holiday that covers three continents. They book a week walking in Austria, followed by a Taj Mahal Discovery and finally a flight to Australia. The grand total is £6595. What was the price of the flight to Australia?

## Working out

- 2 If you had £6000, which holidays would you book? How much money would you have left? Write your answers on the back of this sheet.
