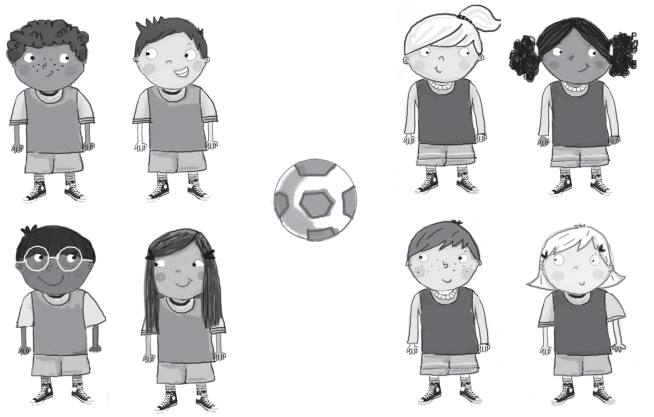
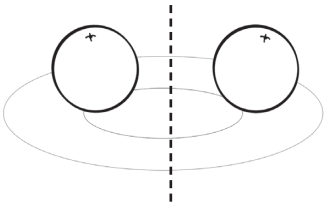
Name: _____ Date: _____

Half-time halves

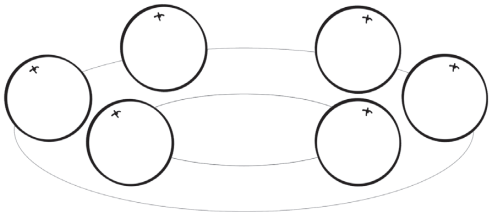
- Know that a half is one of two equal parts
- Find half of a set of objects

You will need:
- orange coloured pencil
- counting objects such as grapes

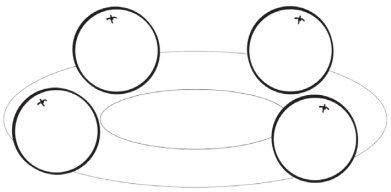




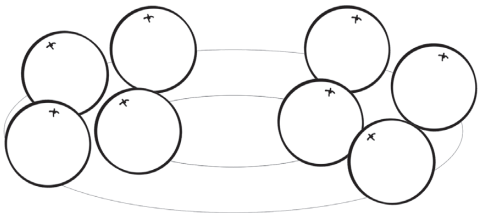
Half of 2 is ☐.



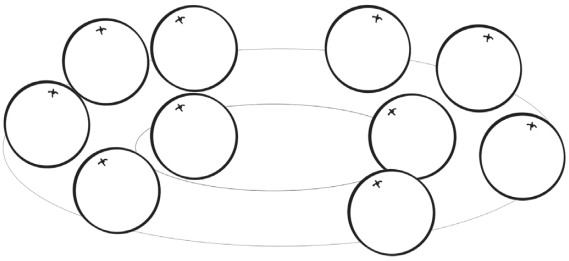
Half of ☐ is ☐.



Half of ☐ is ☐.



Half of ☐ is ☐.



Half of ☐ is ☐.

2	10	3	2	4	5	1	8	6	4

What to do

- The oranges need to be shared equally between two football teams. Ask your child to draw a line to halve the number of oranges on each plate. They then colour one half orange. Finally, ask your child to choose from the numbers at the bottom of this sheet to complete the sentence below each plate.

Use everyday situations to help your child understand fractions and find half of a number. For example, count out an even number of grapes (up to 10) and find half by sharing them equally between two people.
