

Making Duck's Footprint

What you will need:

Duck footprint template

Scissors

Water spray

Cress or mustard seeds

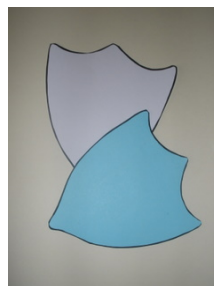

Blotting paper (or serviettes)

Plastic plates

Permanent marker pen

What to do;

1. Draw around the footprint template onto the blotting paper.
2. Cut out the footprint and place it onto the plastic plate.
This will make it easier to carry when the footprint is wet with seeds on it.
3. Write your name on the plate using the permanent marker pen.

4. Spray the blotting paper with water.
5. Sprinkle the seeds over the ducks footprint.

6. Put the plate with the footprint on the windowsill.
7. Watch them grow!
Spray them everyday.
