Money problems

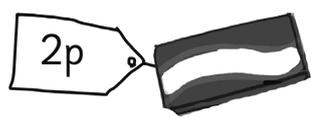

Solve problems about money

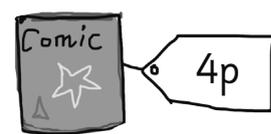

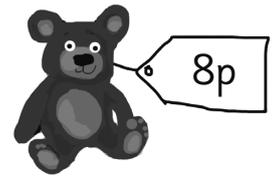

$$\square + \square = \square$$

$$\square + \square = \square$$

$$\square + \square = \square$$

$$\square + \square = \square$$

Teacher's notes

Children write the number sentence to show the total cost for each child's items. Then they circle the coins needed to pay for each pair of items. Note that each group of coins contains two or three 'extra' coins.
