

# Addition detective

Add 2-digit numbers and 1s

$13 + 6 = \square$

$31 + 7 = \square$

$44 + 3 = \square$

$52 + 5 = \square$

$75 + 4 = \square$

$82 + 7 = \square$

$26 + 3 = \square$

$63 + 5 = \square$

$91 + 6 = \square$

$59 + 5 = \square$

$65 + 8 = \square$

$48 + 3 = \square$

$84 + 7 = \square$

$77 + 6 = \square$

$86 + 9 = \square$

$35 + 6 = \square$

$29 + 7 = \square$

$58 + 8 = \square$

### Teacher's notes

Children find the answer to each addition calculation. The first nine questions do not cross the tens boundary. The final nine do cross the tens boundary. Children can use a 1–100 number square or number line for support if necessary.
