

Date: _____

Add three numbers

Add three 1-digit numbers

$7 + 3 + 5 = \square$
 $8 + 6 + 2 = \square$
 $4 + 9 + 6 = \square$

$6 + 7 + 2 = \square$
 $9 + 5 + 3 = \square$
 $3 + 8 + 7 = \square$

$1 + 6 + 9 = \square$
 $5 + 4 + 8 = \square$
 $7 + 8 + 9 = \square$

4	2	8	
9	6	1	
3	7	5	

2	4	7	
5	5	3	
8	6	9	

Teacher's notes

At the top of the page, children work out the answers to the addition calculations. They can use either Base 10 material or a 1–100 number square for support, if necessary. At the bottom of the page, children add together the three numbers in each row or column of each grid and write the answer in the space at the end of the row or column. They can choose which order to add together each set of three numbers. Remind them to look for pairs of numbers that add to ten.
