

# Caterpillar addition

Add a 'near multiple of 10' to a 2-digit number

$$36 + 21 = \square$$

$$28 + 19 = \square$$

$$15 + 41 = \square$$

$$23 + 39 = \square$$

$$47 + 31 = \square$$

$$52 + 29 = \square$$

$$33 + 51 = \square$$

$$24 + 69 = \square$$

$$78 + 11 = \square$$

$$62 + 19 = \square$$

$$16 + 71 = \square$$

$$27 + 59 = \square$$

$$34 + 61 = \square$$

$$38 + 49 = \square$$

$$16 + 81 = \square$$

## Teacher's notes

Children work out the addition calculations using their knowledge of adding multiples of ten, and adding or subtracting one to find the answer. A 1–100 number square may be used for support, if needed.
