

Date: _____

Buying fruit

Solve money problems and give change

$11p + 7p = 18p$ $20p - 18p = 2p$

$\square + \square = \square$ $20p - \square = \square$

$\square + \square = \square$ $20p - \square = \square$

$\square + \square = \square$ $50p - \square = \square$

$\square + \square = \square$ $50p - \square = \square$

$\square + \square = \square$ $50p - \square = \square$

Teacher's notes

Children work out the total cost of the two pieces of fruit. Then they work out how much change will be given when the customer pays with the coin shown.
