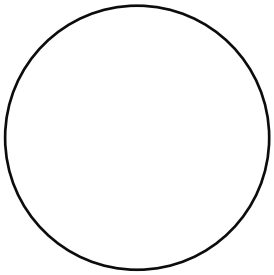
# Drawing 2-D shapes

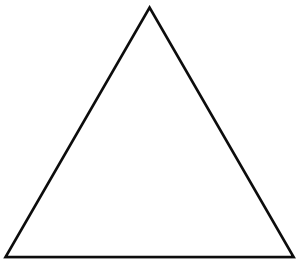
## Recognise and draw 2-D shapes

**You will need:**
- coloured pencils

rectangle circle triangle square

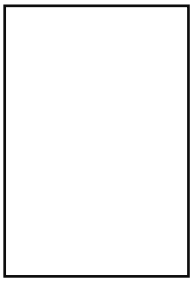


_____

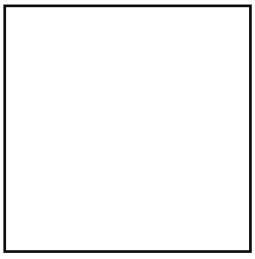


_____

_____



_____



_____

_____

**Teacher's notes**

For each of the five shapes shown, children write the name of each shape underneath. Then beside each of the shapes they draw a picture of a real-life object that is the same shape. For example, they might draw a clock face for a circle. Finally, in the bottom right, they draw and name their own shape and then draw a picture of a real-life object that is the same shape.
