Zoo problems

Solve addition and subtraction problems using written methods

The snakes ate 24 mice on Saturday and 30 mice on Sunday. How many mice did they eat altogether at the weekend?

The keeper gives the monkeys 27 bananas. They eat 14 of the bananas. How many are left?

There are 32 penguins in the zoo and 8 of them are swimming. How many penguins are not swimming?

There are 13 green parrots and 15 red parrots. How many parrots are there in total?

Teacher's notes

Children use their preferred methods to solve the word problems.
