Seaside problems (1)

Solve word problems

You will need:

- scissors
- glue

We got the train at 9 o'clock. It took 2 hours to get there.

We got there at o'clock.

Lee found 13 shells on the beach but she dropped 3.

She still had shells.

Amir brought 6 pasties with him.

Naomi brought 6 too!

They had altogether.

We had 12 tickets for the fair rides.

We used 5 on the dodgems.

We had tickets left.

Teacher's notes

Children cut out the addition and subtraction calculations from the bottom of the sheet. They read each word problem and then decide which calculation belongs with each one before completing the calculation and gluing it into place. Finally, they complete each sentence underneath.

$12 - 5 = \square$

$9 + 2 = \square$

$13 - 3 = \square$

$6 + 6 = \square$
