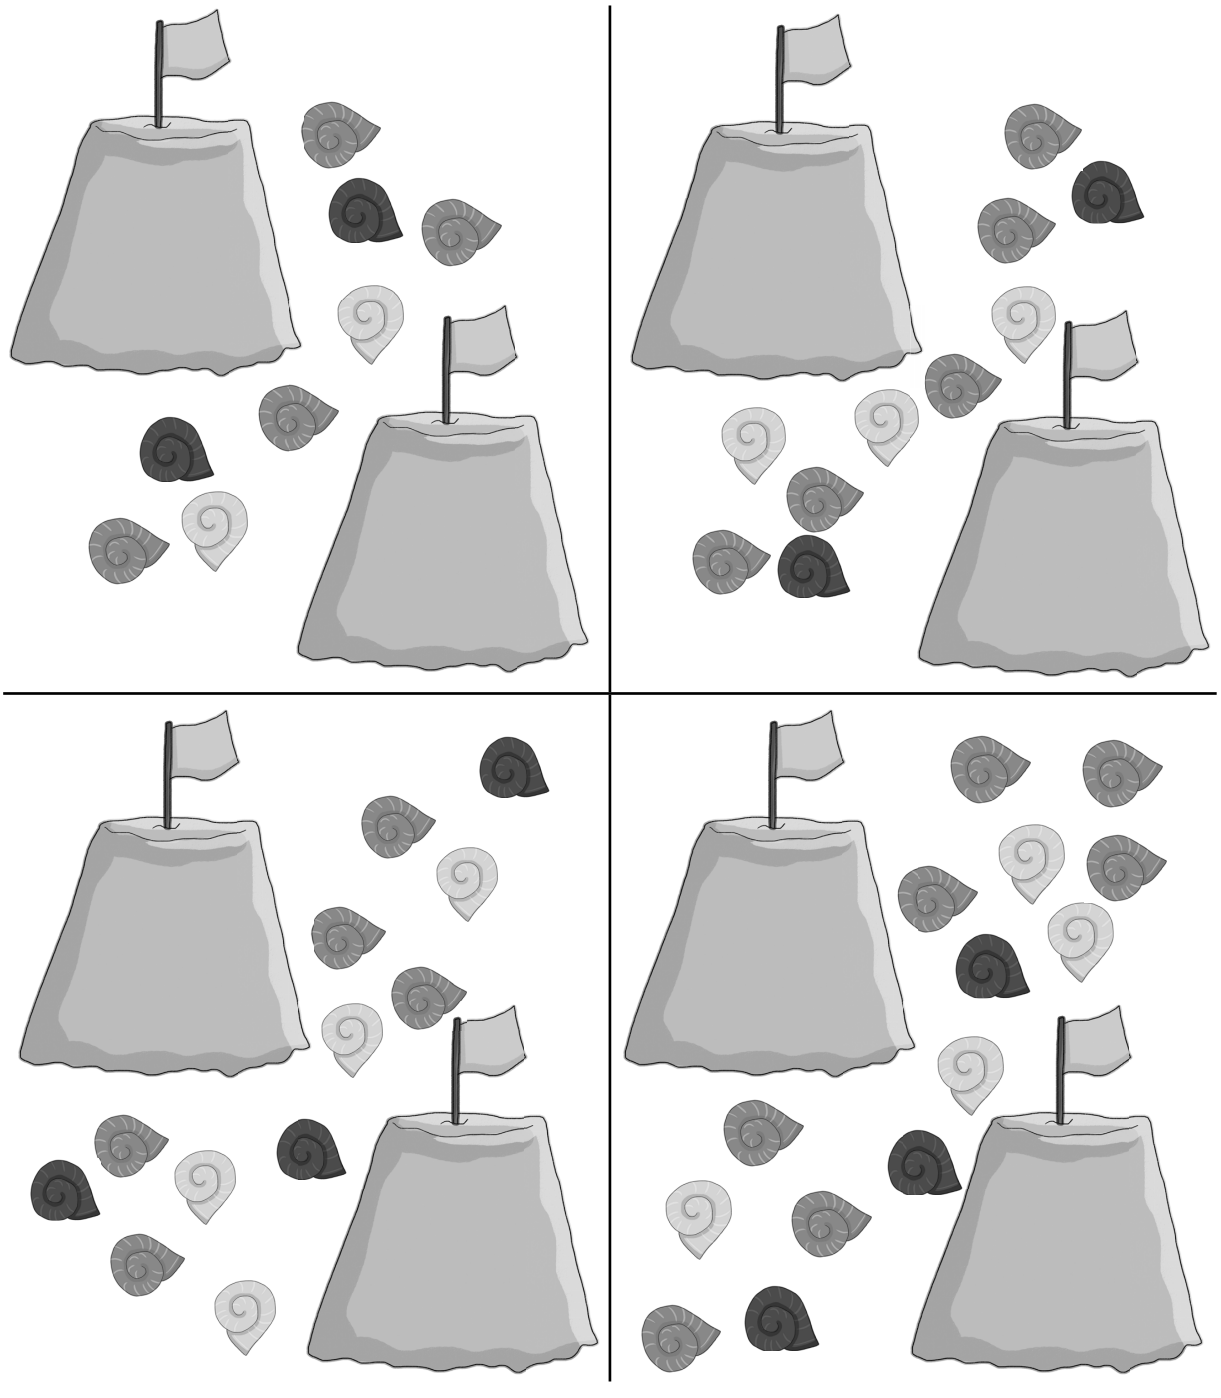
Name: _____ Date: _____

Sharing shells

- I can share objects into equal groups

You will need:
- coloured pencils/ crayons/ felt-tip pens



What to do

- Count the shells in the first box. How many are there? Draw a line from each shell to a sandcastle. Share them equally, so that each sandcastle has the same number of shells. Draw the correct number of shells on each sandcastle and write the number of shells on the flag. There should be the same number on each. Repeat for each pair of sandcastles.
