

Below are 4 cards with fractions on.  
Find 4 different ways of putting any  
three of the cards in order.

Hint: work out the order of all four  
fractions first. Then find all four different  
combinations.

(There are only four possible ways!)

$$\frac{5}{9}$$

$$\frac{2}{6}$$

$$\frac{2}{3}$$

$$\frac{1}{12}$$

3. Use any three of the cards to make each of these correct.

$$\square < \square < \square$$

$$\square < \square < \square$$

$$\square < \square < \square$$

$$\square < \square < \square$$

Show any working out here:

Here are four fraction cards

$$\frac{3}{4}$$

$$\frac{3}{16}$$

$$\frac{5}{8}$$

$$\frac{7}{12}$$

1. Use any three of the cards to make each of these correct.

|  |   |  |   |  |
