# Share with friends

Share objects into equal groups

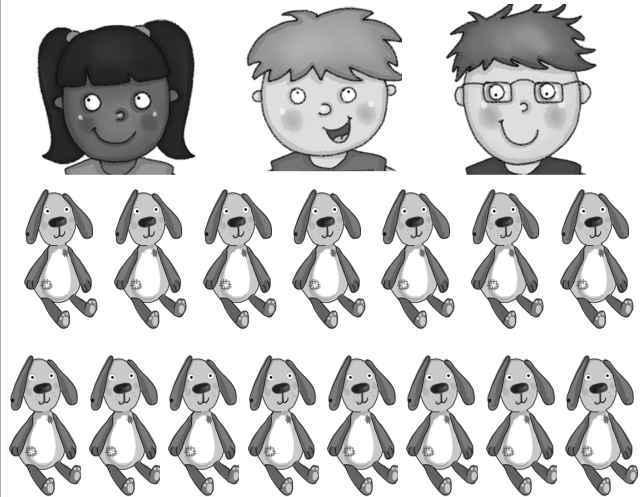

You will need:

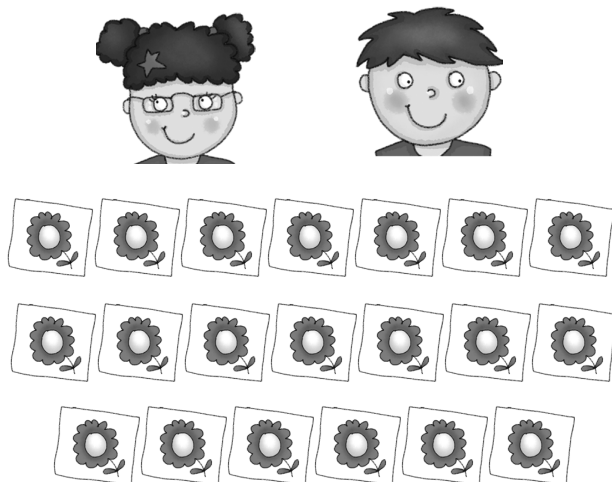

- counting objects, such as counters or beads

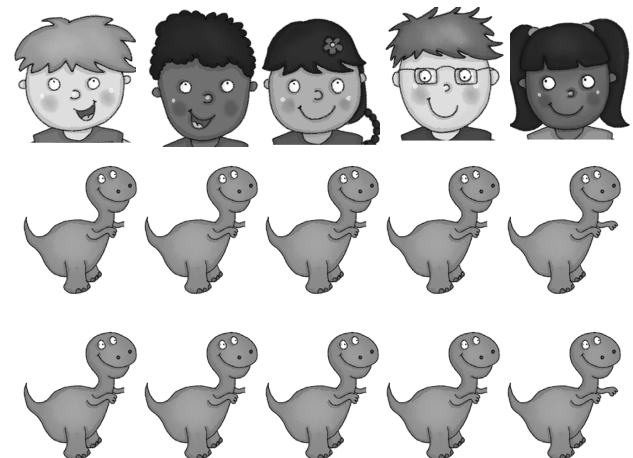

shared between   
is  each.

shared between   
is  each.

shared between   
is  each.

shared between   
is  each.

## Teacher's notes

Children count the number of objects and share them equally between the people shown, using counting objects to help if needed. They then complete the sharing sentence.
