

At Home

Play ' Hunt the 3-D shape'.

Find an adult. Take them into the kitchen and open up all the cupboards!

Secretly choose an object.

The adult asks questions to try and find out which object you have chosen.

Good questions might be:

Does it have 6 faces?

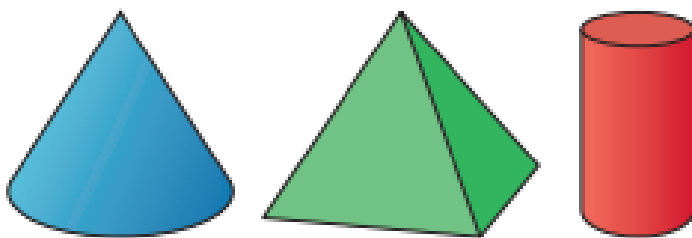

Does the object have a round face?

Is it the same shape as a cereal box?

Is it larger or smaller than a tin of soup?

Play the game several times, changing roles.

What's the same and what's different about these shapes?

Which could be the odd one out and why?

Could each one be the odd one out?

Explain your reasoning.
